<b>Short Abstract:</b>	
<p>FoodLabs is a Berlin-based venture capital fund and venture studio focused on building and backing companies across the food, agriculture, and biotech sectors. With more than 100 investments since 2016, the team has consistently been the first institutional backer of category-defining startups ranging from precision-fermented dairy and mycelium-based proteins to carbon farming marketplaces and next-gen consumer brands. FoodLabs invests at pre-seed and seed, typically leading rounds, while reserving significant capital for follow-ons to double down on winners.</p> <p>For founders, FoodLabs offers more than capital. Its venture studio helps transform breakthrough academic and scientific ideas into scalable companies, while the firm's operating playbook supports portfolio teams with growth marketing, hiring, fundraising, and industry partnerships. With strong ties to corporates, universities, and repeat founders, FoodLabs is often the first stop for entrepreneurs building in AgriFood. As an Article 8 impact fund, it commits at least 70% of capital to ventures that advance sustainable food systems within planetary boundaries.</p>
