Short Abstract:	
<p>Oost NL provides patient capital and hands-on support for Biotech ventures in the east of the Netherlands. We invest from pre-seed through Series B/C with ticket sizes ranging from €250k to €40m, focused on (precision) fermentation and cell technologies. With a strong foundation and network in the Foodvalley (Wageningen area) we open doors to leading R&D partners, test & pilot facilities (such as NIZO and BFF) and a strong industrial network. We help teams scale faster and smarter—from first proof of concept to demo production—through co-investments, infrastructure access and practical venture support.</p>	
Our added value	
<ul style="list-style-type: none"> • Patient capital + active venture support (from lab to line) • Access to R&D, test and pilot facilities (Foodvalley ecosystem) • Network: knowledge institutes, corporates, suppliers, co-investors • Access to regional grant programs & vouchers
