Abstract:	
Cemvita's biotechnology platform transforms industrial waste into sustainable oils and fertilizers through engineered microbes. Our flagship products, FermOil and FermNatural, deliver ultra-low carbon intensity and biodiversity benefits, using 99% less land and water than conventional methods. With commercial deployment underway in Brazil and strategic partnerships across the EU, Cemvita is poised to accelerate the transition to a regenerative bioeconomy. We seek collaboration and investment to expand our nature-positive impact across Europe.
