

Session	Start-ups/SMEs looking for Finance: Series A and Series B/C Funding
Title	Compostable protective packaging, bio-made.
Company	Grown bio b.v.
Speaker	Arthur Moree
Keywords feedstock (max 2)	agricultural waste
Keywords technology (max 2)	mycelium composite
Keywords End-Product (max 2)	protective packaging
Abstract:	
With agricultural rest fibers and roots of a mushroom, Grown bio 'grows' protective packaging. Bio-based, bio-made, bio-compostable. A wide variety of products can be made, a wide variety of fibers can be used. Our protective packaging offers similar properties as EPS, but uses renewable feedstock and has a way better footprint. We have proven the concept by serving commercial customers with our pilot facility. In this facility we have improved product quality fitting market specs, enhanced process speed and decreased unit costs, getting close to par with EPS. We are currently preparing the scaling up to a 1st commercial plant and are preparing for a next phase of funding.
