Short Abstract:	
At Ki Tua Fund, we are dedicated to investing in early-stage startups at the intersection of agriculture, food, and human health globally. Our mission is to collaborate with extraordinary founders and innovative startups to accelerate and scale disruptive technologies that drive meaningful change. By combining science, nutrition, and technology, we aim to create a lasting, positive impact on health and sustainability. Beyond providing capital, we bring unique value to our portfolio through the expertise and resources of our single LP, Fonterra—the world’s largest dairy exporter and a leader in human nutrition products.
