

Session	Start-ups/SMEs looking for Finance: Series A, Series B/C
Title	Pulses: a plant at the heart of our future
Company	INTACT
Speaker	Alexis Duval
TRL	TRL 8-9
Keywords feedstock (max 2)	Pulses
Keywords technology (max 2)	Natural extraction
Keywords End-Product (max 2)	Functional proteins
Abstract:	
INTACT specializes in the circular production of low-carbon ingredients from pulses. The company has developed a globally new patented technology based on the upcycling of co-products to maximize the value of the entire pulse. In addition to extracting naturally protein from pulses for food purposes, INTACT produces the world's first neutral alcohol derived from pulses for use in the cosmetics, spirits and pharmaceutical industries. The combined use of pulses and renewable energy for its processes enable INTACT to reduce the carbon footprint of its proteins and neutral alcohol by more than 80% vs. current market standards. INTACT production site and innnovation center are located ni Baule, Loiret (France). It is also in the Centre-Val-de-Loire region that INTACT is working with its farming partners to establish a regenerative or organic pulse supply chain.
