Title	Typo Foods - Tasty yeast protein
Company	Typo Foods
Speaker	Tue Rasmussen
TRL	TRL 4-7
Keywords feedstock (max 2)	Sugars, flexible
Keywords technology (max 2)	Biotechnology, fermentation
Keywords End-Product (max 2)	Yeast, ingredient
Abstract:	
Typo Foods is developing a next-generation protein ingredient that combines excellent nutrition, taste, functionality, and cost efficiency—enabled by biotechnology. Built on our proprietary yeast platform, we deliver a delicious whole-cell ingredient that is naturally high in protein and dietary fibre, with an industry-leading cost structure. It provides food manufacturers with a versatile ingredient and technology platform for creating differentiated, scalable food products. Our biotechnology platform allows us to continuously improve and tailor the yeast to evolving consumer preferences and product requirements. This eliminates the need for extensive processing or formulation, preserving a simple ingredient declaration and a sustainable production profile. Together with customers, we have tested the ingredient in standalone whole-cut products, as well as in hybrid applications blended with meat. Across these applications, Typo Foods' ingredient has demonstrated improvements in taste, nutritional value, and cost competitiveness versus relevant benchmarks, including meat products. Typo Foods is seeking seed funding to scale production, advance our regulatory program, and accelerate commercial development with existing and new partners.
